Check-in desks

Airport industry

Code: SLF - DSK - BC

Available as single or double units

Custom design

With integrated display and accesories

High end materials and quality finish

Quality finish

Advantages:

Available in different materials:
wood, glass, stainless steel,
composite, stone;
Customisable;
Single stand alone
or double check in;
Integrated;

Custom design

Integrated accesories

Weigh-in conveyors

Airport industry

Code: SLF - CHK - IS

Single or double units

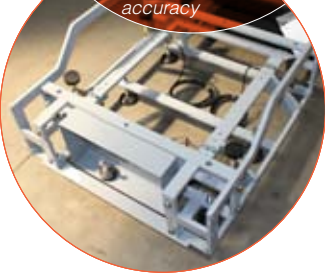

With 4 point loading cells

Economy solution available (single point cell)

CE, OIML, EAC approved scales

4 loading cells for higher accuracy

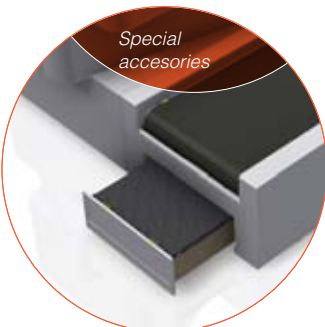

Advantages:

Adjustable configuration;
Weigh-in + (tag) + induction system;
Modular construction
Easy maintenance;
Stainless or composite material finish;

Drum motors

Special accessories

Stainless steel finish

Special materials finish

Return Tray System

Airport industry

Code: SLF - RTS

Standalone unit, Powered

Fitted for accumulation and storage

Available in different dimensions

Can be easily moved (fitted with wheels)

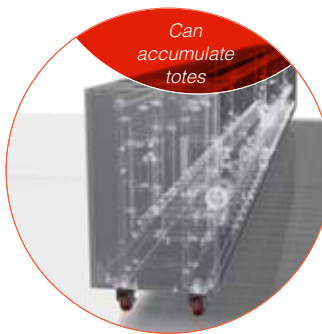

Powered

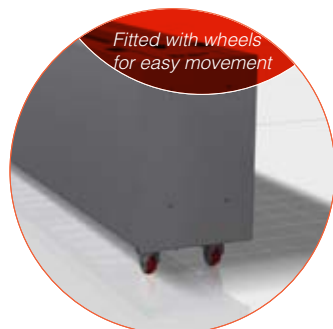

Advantages:

*Modular design
Can transport different types
of totes
Low power consumption
Silent running
Easy maintenance*

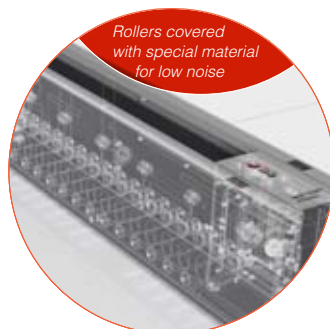

Can
accumulate
totes

Fitted with wheels
for easy movement

Rollers covered
with special material
for low noise

Different lengths available

Reclaim carousels

Airport industry

Code: SLF - TC - U

Length: from 9 to 100 meters

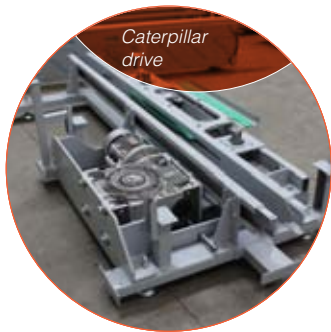

Stainless steel finish

Slats made from fire retardant materials

Available shapes: O, L, T, U; horizontal or inclined transport

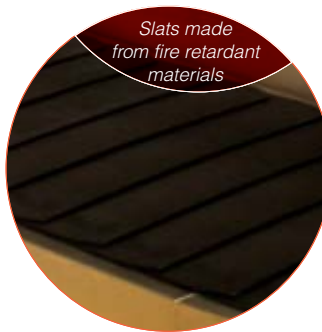

Caterpillar drive

Advantages:

*Adjustable configuration according to existing layout;
Low noise;
High transport capacity;
Low maintenance;
Stainless finish;*

Slats made from fire retardant materials

Stainless finish

Load up to 100 kg/ml

Different shapes

Baggage handling systems

Airport industry

Scalable systems
Standardised components
3d Environment simulation
For small and medium airport
Complete solution

3D Environment simulation

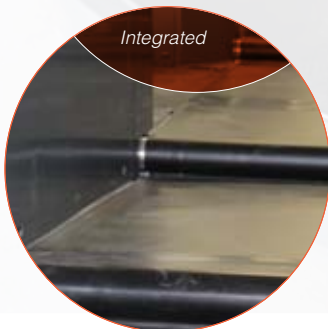

Advantages:

Modular solution;
Up to 5 level of security;
High processing capacity;
Low maintenance;
Low noise;
Integrated automation;

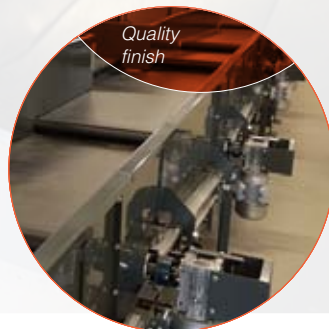

Standardised components

Integrated

Quality finish

Complete customised solutions.

Baggage handling systems

Linear layout, for 150 baggages / hour

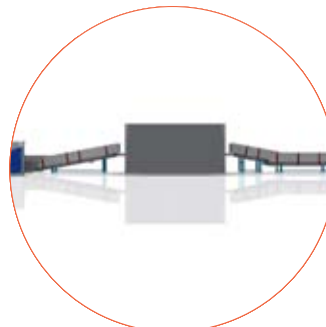

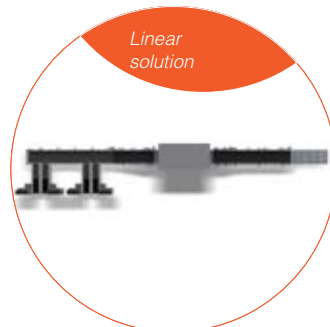

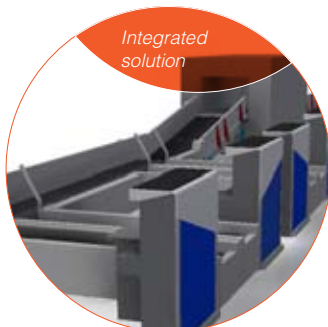

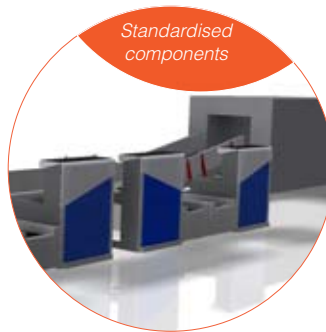

Required space: 24 x 4 meters
 4 Check in Desks
 4 Double stage units (Weigh and Induction)
 Collecting conveyors
 For small and medium airport
 Complete solution
 *The X-Ray machine available on request

Advantages:

- Modular solution;
- High processing capacity;
- Low maintenance;
- Low noise;
- Integrated automation;

Baggage handling systems

Compact layout, for 180 baggages / hour

Required space: 12x 7 meters

Compact solution

5 Check in Desks

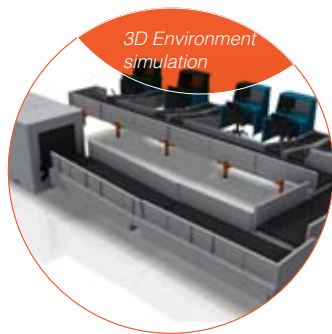

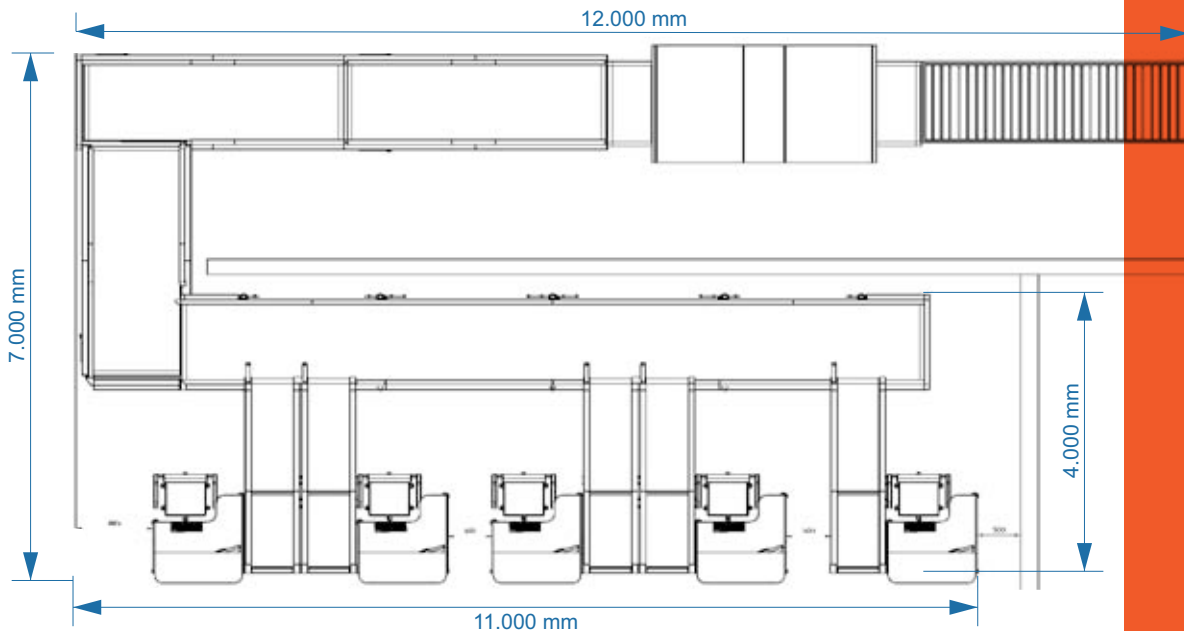

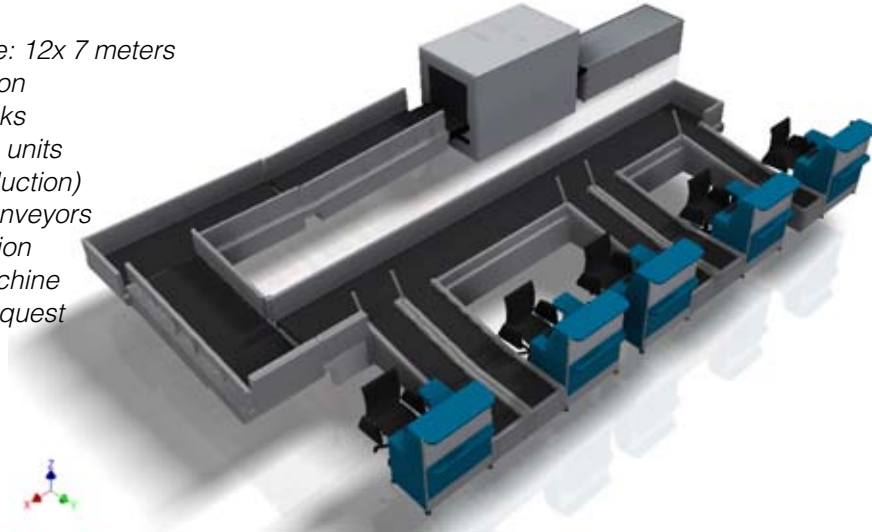

5 Double stage units

(Weigh and Induction)

3 collecting conveyors

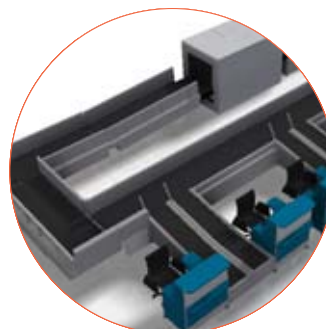

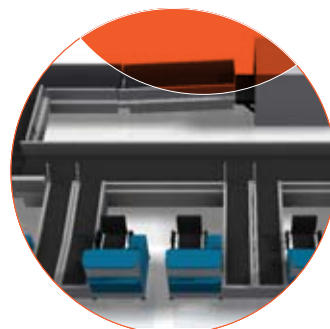

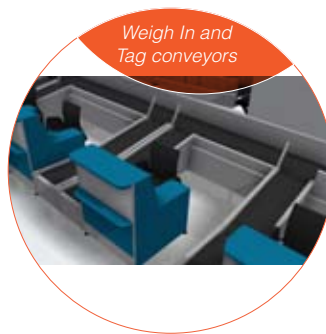

Complete solution

*The X-Ray machine
available on request

Advantages:

- Small footprint;
- Turnkey solution;
- Easy to upgrade system;

Baggage handling systems

Complex layout, for 500 baggages / hour

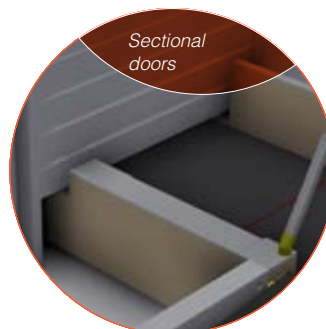

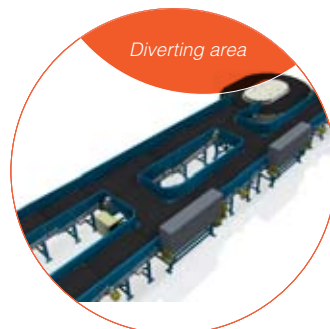

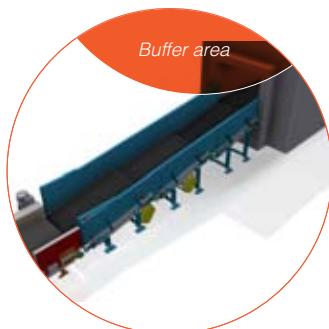

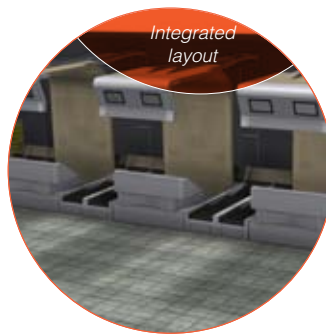

Required space for public area: 15 x 4 meters
Required space for BHS: 34 x 7 meters
8 Check in Desks (3 double, 2 single)
4 Touble stage units (Weigh, Tag and Induction)
2 collecting conveyors
Complete BHS solution with 5 Levels of security
*The X-Ray machine available on request

Advantages:

Modular solution;
Up to 5 level of security;
High processing capacity:
500 baggages/hour;

Brief History

CITCO (romanian acronym for Industrial Reasearch Center in Conveyor Technology) is a division of SELF TRUST ROMANIA, a company established in 1999, specialized in conveyor manufacturing.

CITCO's engineers are designing solutions for a large number of industrial applications, starting from the simplest conveyor types working individually to complex transport systems. Our customized transport systems can reach a degree of high complexity within the projects involving the integration of the systems in the manufacturing lines.

Team

We are a young and dynamic team, formed in the last 15 years with the goal of becoming one The best conveyor manufacturer.

Our motivations comes from our satisfied clients and well done projects.

With a team of over 70 employees, out of which 9 are design engineers, SELF TRUST ROMANIA answers with promptitude and offers solutions adjusted to the requests of each of our customers.

Our Designing Department uses Autodesk Factory Design Suite Ultimate, Math CAD and Math LAB programs for designing the most detailed projects.

Machineries

SELF TRUST ROMANIA has invested over 4 million Euro to build a new factory and in a second metal processing line (cutting, bending, punching). The Industrial Reasearch Center in Conveyor Technology - CITCO was a part of 1.1 million Euro from the total investment and it was implemented with European Union support.

The investment included the following equipments:

*Hydraulic shear for steel sheets - 4050 x 13 mm
Hydraulic press brake - 4000 mm x 220 To
CNC machining Minicentre - 4 axes, 500x900 mm table
CNC lathe - 700x2100 mm
Waterjet cutting machine OMAX - 5 axes, 3000 x 2000 mm table
Other equipments*
